Screening Tools/Questionnaires (e.g. Orebro/DASH etc)- comment on change over time

DASH: 24/04/19 ADL's: 60/100 Work module: 70/100

stpatient has reported improvement in function over the last month, however nil change in pain report to date.

## Functional/ Return to Work Limitations E.g.: Impairment(s) preventing full work performance

Persistent wrist pain is limiting return to pre-injury duties at work including use of spanners and tools, use of welding equipment, lifting sheets of metal over 5kg

## **Biopsychosocial Factors**

Have you have identified, or are you aware of any factors that may impact the workers return to work/barriers for return to work? If so, what are they and do you have any recommendations for addressing them?

E.g. diagnostic imaging, specialist referral or referral to other AHP, reassurance, education regarding injury and treatment expectations, work site assessment, etc.

Persistent ulna sided wrist pain with provocative tests suggestive of possible TFCC tear/involvement indicates that specialist referral for further assessment/investigations may be appropriate as per last report to GP.

| Current Work Status   |  |  |  |  |  |  |
|---|--|--|--|--|--|--|
| Hours       Current duties         Pre-injury hours at work       38       per week       □       Pre-injury duties         Current hours at work       38       per week       □       Alternative/modified duties         Not working |  |  |  |  |  |  |
| I would like more information about the duties and the associated physical demands of the workers pre-injury occupation/available duties  |  |  |  |  |  |  |
| Return to Work Progression  |  |  |  |  |  |  |
| Has the worker's hours and/or duties progressed in the last six weeks? $\square$ Yes $\boxtimes$ No   |  |  |  |  |  |  |
| Provide details  Remains on light duties at work on account of persistent wrist pain, weakness and stiffness.   |  |  |  |  |  |  |
|   |  |  |  |  |  |  |
| Is the worker likely to return to the functional capacity required to perform their pre-injury duties?  Yes Anticipated timeframe Dependent on further assessment findings  |  |  |  |  |  |  |
| No Comment:   |  |  |  |  |  |  |
| Unsure Comment:   |  |  |  |  |  |  |
| Do you have any comments to assist the medical practitioner certify capacity for the worker?  |  |  |  |  |  |  |
| e.g. consider current functional measures, modifications to the workplace   |  |  |  |  |  |  |
| As above.   |  |  |  |  |  |  |
| Proposed Management plan  |  |  |  |  |  |  |
| Future Goals - Treatment should be specific and focused on improving function and return to work.   |  |  |  |  |  |  |
| Increase pain free wrist functional use and return to pre injury duties at work   |  |  |  |  |  |  |
| Treatment Type Wrist Proprioceptive and dynamic stabilisation strengthening program Supportive splinting for TFCC (warrior cuff, widget)  Frequency 1-2x week 3 months  |  |  |  |  |  |  |
| Active, passive ROM and graded strengthening to tolerance Pain management/strategies/education  |  |  |  |  |  |  |
| Have self-management strategies been implemented?   ☐ Yes ☐ No  |  |  |  |  |  |  |
