Useful resources for Occupational Therapists providing upper limb treatment

Explanatory notes – completing the TMP

The TMP is intended to provide greater clarity about future treatment options for workers who are likely to require more than 10 upper limb consultations (or require four weeks of treatment –whichever comes first). It will also provide approved insurers and self-insurers with a mechanism to determine whether the treatment and costs are reasonable under WA workers' compensation legislation.

When treating an injured worker, it is expected the therapist adopt the five guiding principles outlined in the Clinical Framework for the Delivery of Health Services. The clinical framework is supported by WorkCover WA. A copy is available at: www.workcover.wa.gov.au.

The five guiding principles of the clinical framework are:

- 1. Measurement and demonstration of the effectiveness of treatment
- 2. Adoption of a biopsychosocial approach
- 3. Empowering the injured person to manage their injury
- 4. Implementing goals focused on optimising function, participation and return to work
- 5. Base treatment on best available research evidence

In the Clinical Assessment section, document pre- and post- measures to demonstrate the effectiveness of treatment, and whether or not treatment is achieving functional goals.

Notes for therapists

- A TMP should be completed when the therapist is of the view that treatment will be required beyond ten consultations (or four weeks -whichever comes first).
- The TMP may be initiated by a therapist or requested by an approved insurer or self-insurer.
- A copy of the TMP should be provided to the worker, treating medical practitioner and insurer/selfinsurer.
- All sections of the TMP should to be completed.
- The fee for completing the TMP is aligned to the rate for the physiotherapy TMP.
- You are not required to elaborate on the self-management strategies you have implemented. It is
 expected you empower the worker to manage their injury, through education, setting
 expectations, developing self-management strategies and promoting independence from
 treatment.

Notes for insurers and self-insurers

- Insurers and self-insurers have a responsibility to determine whether treatment for workers is "reasonable" (pursuant to Clause 17 Payment of medical and other expenses of Schedule 1 to the Workers' Compensation and Injury Management Act 1981).
- The TMP may be used as a mechanism to assist in determining whether any treatment proposed by a therapist is a "reasonable" expense.
- It is desirable that insurers and self-insurers respond to therapists in a timely manner. To avoid potential delays in treatment, the benchmark for responding is within three to five business days from receipt of the TMP.

WorkCover WA Notice

WorkCover WA has released a Notice which clarifies the principles and rules applicable to the provision of Occupational Therapy – Upper Limb services, in particular: consultations, reporting, TMPs and charging for consumables. The Notice is available at: www.workcover.wa.gov.au
